

I Have had Satellite radio for well over a year and a half. It has a great variety of programming and excellent audio quality. When Traveling the interstate it is a relief to know that with a push of a button I can receive regional traffic and weather reports all preprogrammed before my trip.

I feel it is safer to drive With XM radio for the plain fact that I don't have to search for stations that fade in and out as I drive.

Please reject NAB's petition 04-160 and support XM's ability to provide the kind of programming That I deserve.

Thank You,

Ralph A. Fico
